Dear John

**ARCHAEOLOGICAL WATCHING BRIEF - LOWFIELDS SCHOOL ACOMB YORK**

Please be advised that we carried out a watching brief at the above site between the 9th and the 11th May 2007. Groundworks consisted of the excavation of 96 foundation pits, measuring predominantly 1m<sup>2</sup> for Portakabin accommodation. The sequence encountered consisted of natural clay and sand subsoil, cut into by a system of land drainage, sealed by topsoil; no archaeological remains were encountered.

Please find enclosed two plans showing the site and position of groundworks, the excavation of which was under archaeological supervision.

I hope that you are satisfied that the archaeological condition can now be discharged. If you require any further information, please do not hesitate to contact me.

Yours sincerely

**For and on behalf of Field Archaeology Specialists**
