The government expects you to continue in education or training until at least your 18th birthday (throughout Year 12 and into Year 13). This will allow you to gain skills and qualifications that help you to progress to higher education, work, and adult life.

Schools and the Local Authority (City of York Council) work together to guarantee that you will have an appropriate offer of education or training by the end of September after you finish Year 11.

If you have not been accepted onto a full-time course, or into employment with training, don't worry. There are some shorter programmes available, that you can join at other times in the year, to help you progress into full-time education, or employment with training (see pages 22-24).

York has a wide range of high-quality options available for all young people, at all levels. Whatever you are doing now, there is a pathway for you to follow from September 2026.

When you have decided on your preferred pathway, you can make applications to school sixth forms, colleges, apprenticeship employers or other providers. Information on how to apply will be available on their website or in their brochure (often called a 'prospectus'). Your school will be able to provide you with further information.

Helping you decide

Deciding what you want to do after Year II can be both an exciting and stressful time, and there are many options to consider. This booklet gives initial information and tells you where to find out more. It has been designed with all students in mind, with the sections in blue containing additional information for students with an existing **Education**, **Health and Care Plan (EHCP)**.

All sections relating to an Education, Health and Care Plan (EHCP) will have an EHCP Icon.

When making decisions, it is important to have the right information. To improve your motivation and provide a foundation for positive results next year and beyond, take the time now to:

- Find out information about different routes into education or employment with training (often referred to as 'pathways') from events, websites and literature.
- Share the information in this booklet with your parent or carer.
- Make sure you attend taster days (see page 29) with post-16 providers. This is especially important if you are considering taking up a subject you have not yet studied.
- Ensure that you understand the different qualifications, levels and pathways available (see pages 9-21).
- Talk to your teachers about the Careers Education, Information, Advice and Guidance programme in your school, which can support you to understand your choices and make successful decisions.
- Have a chat with your parents/carers about what you enjoy, what you are good at, what motivates you to learn, the environment you want to be in and your own learning preferences.
- Think independently about your choice, not about what your friends are doing.

If you have Special Educational Needs and/or Disabilities

If you have Special Educational Needs and/or Disabilities (SEND), your focus may not just be on education or training but may cover the broader aspects of preparing for adult life.

It is also realistic to think about paid work. Paid work can give you financial independence, help you to meet friends, and it's good for physical and mental health. It's never too early to start thinking about the best way to prepare for paid work – start by thinking about what you enjoy, your hopes, and the skills and qualifications you may need.

To help you achieve your aspirations, your learning could become more vocational (education or training linked to a particular skill or trade). These programmes can also help you identify opportunities for employment, and improve your communication, relationship, and independent living skills. Most full-time programmes are 3-4 days per week, giving you time for activities outside of education.

If you have SEND and an EHCP this may help inform your education, employment or training choices. Not all young people with SEND have or require an EHCP. If you need additional support, speak to student services at your education setting. You can also access general information and advice from SENDIASS (see page 61).

York SEND Local Offer

The York SEND Local Offer: <u>yorksend.org</u> provides more information for young people with special educational needs, disabled young people and parents and carers.

If you have an Education, Health and Care Plan (EHCP)

You can check if you have an EHCP by asking your teacher, parent, carer, or someone who supports you.

In Year II, the annual review of your EHCP will focus on your preparation for leaving school. It is important that you try to take part in your review meeting to help you plan your next steps towards training and employment.

The Preparation for Adulthood outcomes in your EHCP will help you to make this plan into a reality, and guide your decisions about your education, training and employment choices. Your SEND caseworker will support the transition process, and you will have the support of a Specialist Learning and Employment Adviser, who can help you to prepare to make choices relating to education, training and employment.

You will also have opportunities to attend open events and taster sessions to support your decision making.

In this guide, sections with a blue background and a pink symbol show additional education and employment with training opportunities if you have an EHCP, including:

- Local schools and colleges including study programmes (see pages 13 and 27-29)
- Supported Internships (see pages 25 and 30-40)
- Personalised Learning and Work Experience Programmes (see pages 26 and 30-40)
- Useful contacts for you when preparing for adulthood (see pages 61-62)

Qualification Levels

The level of the programme that you will be able to start will depend on what qualifications you already have or are expecting to achieve by the time you move on from Year 11. GCSEs are graded using a numbered scale from 9 (high) to 1 (low).

Currently, if you are not awarded a GCSE at grade 4 (previously grade C) or higher in English or maths, the relevant subject/s will be included in your next course or training programme.

See the next few pages for an overview of the different levels of qualifications and courses.

Examples of courses and qualifications					
Level	Academic	Vocational and technical	Work-based	Average time to complete	
Post-grad Degree Apprenticeship, Master's Degree, NVQ, Level 7 Award, Post-graduate Certificate, Post-graduate Diploma				18-24 months	
6	Level 6 Award, Certificate, Diploma	Level 6 Award, Certificate, Diploma, Degree with or without honours Graduate Certificate, Graduate Diploma Degree level apprenticesh		3 years	
5	Diploma of Higher Education	Level 5 Award, Certificate Diploma, Higher National Diploma (HND) Foundation Degree	Higher level apprenticeship	I-5 years	
4	Certificate of Higher Education	Level 4 Award, Certificate, Diploma, Higher National Certificate (HNC)	Higher level apprenticeship	l year	
Entry Requirements* ^ 2-3 A Levels or equivalent level 3 qualification, plus GCSE English and maths grade 4-9 ^					
3	A Level	BTEC level 3 Award, Certificate, Diploma, T Level	Advanced level apprenticeship	2 years	
Entry Requirements* ^ At least 4 GCSEs at grade 4-9, (often including English and maths); or another level 2 qualification ^					

Examples of courses and qualifications					
Level	Academic	Vocational and technical	Work-based	Average time to complete	
2	GCSE Grades 9-4 Level 2 Essential Skills Level 2 Functional Skills	BTEC level 2 Award, Certificate, Diploma	Intermediate level apprenticeship	l year	
	Entry Requirements* ^ Level I qualification or some GCSEs at grade 3 ^				
I	GCSE Grades 3-1 Level 1 Essential Skills Level 1 Functional Skills	Level I Award, Certificate, Diploma		Varies	
Entry Level Award, Certificate, Diploma Functional Skills entry level 1, 2 and 3 Essential Skills and Skills for Life			Varies		
Entry Requirements* ^ No GCSEs of formal entry requirements ^					

^{*}These are typical entry requirements, but some courses have different entry requirements. You would need to check. For more information on what qualification levels mean, visit **GOV.UK**.

Further Education and Training

All post-16 study programmes typically combine qualifications and other activities and are tailored to your prior attainment and career goals. They usually include a qualification (academic, vocational or technical) and preparation for employment.

All courses below are classed as full time, however, may not require attending classes five days a week.

Academic qualifications

If you want to continue studying your favourite subjects in-depth at a sixth form, college or other provider or if you're thinking about university.

A Levels (level 3)

A key route into higher education for degrees or degree level apprenticeships. You will typically choose 3 A Levels which are available in a wide range of subjects across the city: for example history, maths and sciences to more applied subjects such as business, media studies and IT. They are usually studied at the same time over two years. Alongside your chosen A Levels, you will have opportunities to undertake activities that expand your learning beyond the subjects you're studying (these are known as enrichment programmes and can cover a range of areas).

Vocational, sector-related or applied general qualifications

If you're interested in a particular sector or industry, but not sure what job you'd like to do and would like to develop transferable knowledge and skills. They are available in a range of sizes which are equivalent to one, two, or three A Levels and can enable entry to employment, an apprenticeship or a range of higher education courses. These are typically more coursework based.

BTEC Awards, Certificates and Diplomas (level 2 and 3)

If you would like a course that's more practical, includes some work experience, or you already know what type of job you want. There are many types of technical qualifications in a wide range of subject areas and levels. They enable entry to employment or an apprenticeship in that occupational area, or progression to a related further or higher education course.

Technical or job-related qualifications

If you would like a course that's more practical, includes some work experience, or you already know what type of job you want. There are many types of technical qualifications in a wide range of subject areas and levels. They enable entry to employment or an apprenticeship in that occupational area, or progression to a related further or higher education course.

T Levels (level 3)

Equivalent to three A Levels, T Levels offer specialised technical knowledge and skills tailored to specific job roles. They combine classroom learning with an industry placement of at least 315 hours, serving as a route into employment, further study or a higher apprenticeship. Locally, Askham Bryan College, Bishop Burton College and York College offer T Level courses in a wide range of areas, such as construction, engineering, education, early years and management. Visit their websites for further details.

Technical Certificates/Diplomas (level 2)

These give you the opportunity to develop specialist knowledge and skills to cover jobs where employers recruit people with specific level 2 qualifications, as well as jobs where you need to have a level 2 qualification before you can progress to level 3. Typically, more exam and coursework based and are often used alongside re-takes of English and/ or maths. Designed to support you to progress to higher level study such as T Levels or apprenticeships.

Work-based qualifications

If you know what sector or organisation you'd like to work in, or want to gain transferable skills that employers value.

Apprenticeships (levels 2-7) (see pages 15-20)

They enable you to work alongside experienced staff, gain job-specific skills and get paid a wage. You usually start on level 2 or 3 (equivalent to GCSE or A Level) and could progress up to level 6 or 7 (bachelor's or master's degree level). You benefit from off-the-job training to improve your skills and knowledge to help you perform better in your role. You may complete a portfolio, formal assessments, qualifications and examinations or projects. Apprenticeships often lead to progression in employment or to university.

NVQs (level I and above)

NVQs are now usually integrated into other work-based qualifications, rather than standalone qualifications. They can be taken by school and college students with a work placement or part-time job* that enables them to develop and demonstrate the appropriate skills employers need. They are assessed in a combination of ways: portfolio and observation.

* if you are aged 13-16, your employer must obtain a child employment permit from your local council.

Additional pathways for students with an EHCP

- Supported Internships (see page 25)
- Personalised learning and work experience programmes (see page 26)
- Specialist providers and pathways for young people with an EHCP (see pages 30-40)

These programmes will help develop skills for paid employment and may help you to progress onto an apprenticeship. (See page 15-17)

Other pathways

• Below level 2 (entry level – level I) (see pages 22-24)

If you are not quite ready to progress to a level 3 qualification, then Foundation Learning could be for you. Foundation Learning is an individual programme, to help you focus on your own specific needs, e.g. personal and social skills, confidence building, reading, writing, numeracy and digital skills. Programmes include vocational learning and skills development and can include a range of vocational options of various durations.

Institutes of Technology (level 3-5)

Institutes of Technology (IoTs) are collaborations between Further Education (FE) providers, Higher Education (HE) providers and employers.

loTs deliver high quality, technical qualifications, such as Higher National Certificates (level 4), Higher National Diplomas (level 5), apprenticeships (levels 2-7), T Levels (level 3) and foundation degrees (level 5).

Courses specialise in subjects that suit the region's skills needs including agriculture, horticulture & animal care, digital, engineering and construction, as well as other technology-focused industries like transport, creative and manufacturing.

York College & University Centre and Askham Bryan College are key partners in the IoT locally (although do not necessarily offer all courses/qualifications).

For more information and to read the full list of courses and partners involved in the Yorkshire & Humber IoT, visit York College - Institute of Technology (yhiot.ac.uk).

Apprenticeships

Apprenticeships combine real work with training and study. You work alongside experienced staff and gain job-specific skills that you put into practice straight away. The employer is responsible for covering all apprenticeship training and assessment costs, usually between £5,000-£27,000, and cannot request an apprentice to contribute. Employers can, however, receive government grants and funding to support with this.

As an apprentice you'll also:

- Receive a contract of employment usually full-time for 12-20 months, however depending on the apprenticeship and employer, you could work part time.
- Earn a wage and get holiday and sick leave entitlements.
- Follow an apprenticeship standard (course) that is relevant to your job role.
- Spend at least 6 hours per week (within your contracted hours) building your portfolio of evidence to showcase the knowledge, skills and behaviours you are learning as part of the apprenticeship standard.
- Undertake an end-point assessment (EPA).

An apprenticeship often leads to progression in employment, a higher-level apprenticeship, or university.

For a searchable list of approved standards, visit the <u>Skills England</u> (instituteforapprenticeships.org/apprenticeship-standards).

Apprenticeships can be well suited to people with a learning disability as they combine practical training with study and can be part-time if needed. Employers are required to make reasonable workplace adjustments, and for people with an EHCP or who previously had a Statement of Educational Need, there may be lower minimum English and maths requirements.

339,580

people started an apprenticeship in 2023/24

600+

apprenticeship standards approved for delivery

Data sources:

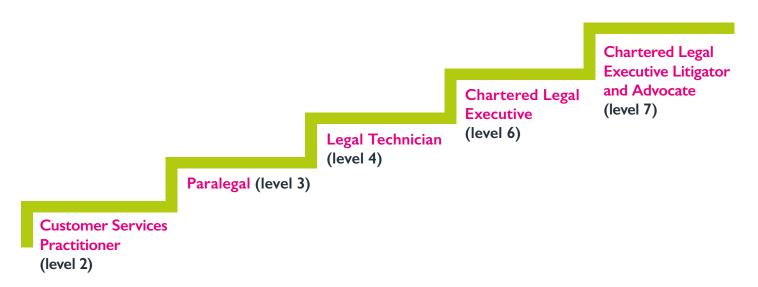

- » Explore Education Statistics Gov.UK 25 July 2025 (explore-education-statistics.service.gov.uk/find-statistics/apprenticeships)
- » <u>Institute of Apprenticeships</u> (instituteforapprenticeships.org/apprenticeship-standards)

Levels and entry requirements

You usually start an apprenticeship at level 2 or 3 (equivalent to GCSE or A Level) and could continue onto level 4 or 5 (foundation degree level) and in some cases, up to level 6 or 7 (bachelor's or master's degree level). If you do not hold English and maths GCSE passes, or Functional Skills level 2, and are aged 16-18 when you start, you would be supported to re-sit them alongside any level of apprenticeship.

Levels of Apprenticeships				
Intermediate Level 2	Advanced Level 3	Higher Levels 4 - 5	Degree Levels 6 - 7	
Broadly equivalent to GCSEs	Broadly equivalent to A Level	Broadly equivalent to Foundation Degree level	Moving on to Degree and Master equivalent qualifications	
A minimum of 12 months	Average of 18 months	Average of 24 months	Average of 24 – 48 months	

You might have to start a lower-level apprenticeship straight from school but could progress through training and experience. For example, in the legal sector:

See pages 42-48 for local labour market information.

Foundation apprenticeships

Level 2 Foundation Apprenticeships (available from 2025/26) are employed positions for younger people who will benefit from a wide range of experiences and are maybe unsure which area to specialise in. They provide a mix of employability skills and behaviours, technical knowledge and skills, and associated English and maths. Initially, they will be offered within the Building Services, Engineering and Manufacturing, Network and Infrastructure, Software and Data, and Health and Social Care sectors.

Combining hands-on practice in the workplace with off-the-job learning, they will not only help grow your skills but will also help to inform your next career steps. Typical progression routes will likely include employment or progression onto a higher-level apprenticeship or T Level.

Training providers

Apprentices and employers are supported by a training provider, who deliver the skills, knowledge and behaviours required for the apprenticeship. These could be independent organisations, colleges or universities. There are several ways to receive training: day release at a college or training centre, block placements, or virtually with visits to your workplace by the training provider.

Financial support

If you have been in the care of the local authority, a <u>bursary for care leavers</u> (apprenticeships. gov.uk/apprentices/support-care-experienced-apprentices) (up to the age of 25) may be available. This is dependent on your circumstances. For more information **see page 64**.

Applying

Apprenticeships are advertised year-round, however some larger apprenticeship recruitment drives, or degree level vacancies tend to take place between October and February, to start the following September.

- » Main government apprenticeship vacancy website: Find an Apprenticeship (gov.uk/apply-apprenticeship)
- » Construction vacancies:
 <u>Talent View Construction</u> (talentview.org/construction)
- » Rail vacancies:
 Routes into Rail (routesintorail.org)
- » City of York Council York Apprenticeship Hub's Facebook Group: Apprenticeships in York (facebook.com/groups/apprenticeshipsinyork)

- » Apprenticeships and graduate jobs:
 UCAS (ucas.com/explore/search/apprenticeships)
- » Higher and Degree Vacancy Listing (updated twice per year):

 <u>Amazing Apprenticeships</u> (amazingapprenticeships.com/higher-degree-listing).
- » Check which training providers deliver the apprenticeships you are interested in and contact them for upcoming vacancies:

 <u>Find Apprenticeship Training</u> (gov.uk/employers-find-apprenticeship-training).

As not all apprenticeship jobs are advertised on the websites above, approach employers with your CV and check their websites and social media throughout the year. Employers may not be considering an apprentice but might change their minds when presented with a great candidate.

Further information

- » Amazing Apprenticeships Resources (amazingapprenticeships.com/resources) has a range of apprenticeship resources including guides on applying, career paths linked to subjects, case-study videos, parents & carers pack, webinars and the Higher and Degree vacancy listings.
- » <u>UCAS</u> (ucas.com/apprenticeships) has careers advice and tools, guides, a podcast, and information.
- » York Apprenticeships (york.gov.uk/yorkapprenticeships) can provide you with local information, including details of planned recruitment events.

Advice from York Apprentices

I chose this route as it allows me to learn a trade while also getting a qualification.

Although an apprentice wage can sometimes be lower initially, the **prospects** at the end are very good.

The key thing **employers are looking for** alongside your qualifications is **experience**. An apprenticeship gives you that.

Apply for several different positions that appeal to you, as you can often get a feel for a place during interviews and there is also a lot of competition for vacancies.

Do research and look at your options. It puts you a step ahead at a young age, earning a wage, gaining work experience and getting qualified.

Apprenticeships give you lots of **opportunities**and experience. The best thing about it is you get to earn while you learn.

Supported Employment

A personalised model for supporting people aged 18 years or older with significant disabilities to secure and retain paid employment. Eligible young people may progress from other programmes such as work experience, apprenticeships and Supported Internships.

You will get:

- Support to identify your aspirations, learning needs, skills, experiences and job preferences (with parent/carer and support worker involvement).
- Support with practical job finding and job carving to ensure it suits your needs.
- An induction in the workplace and ongoing training as well as out of work support if needed.
- A development plan to record your goals.
- Support with career development beyond the programme.

For more information on where this is available locally (see pages 30-40).

Supported Employment is overseen by the British Association for Supported Employment (BASE).

If you are not ready to start a course in September or find the course you have chosen is not right for you, other learning options may be available. Below are some examples of local programmes that accept learners at different times in the year (subject to change).

York College

Visit: yorkcollege.ac.uk

September

Level I provision is available in most curriculum areas and is suitable for learners with few, or no, qualifications on entry, starting in September. Students can ask about starting their studies in a subject they are interested in by attending College open events and during enrolment.

Entry Level 3, Level 1 and Level 2 Vocational Studies are also offered. These programmes are based around employment, training and personal development.

They are designed to help with key employability skills development and self-confidence, whilst also focusing on English and maths if you have not secured a Grade 4 or above at GCSE. These courses are typically 3 days a week.

January

A range of vocational provision is available across College starting in January. The college's careers team can work with you to find suitable courses starting at this time of year.

Askham Bryan College

Visit **Foundation Learning at <u>Askham Bryan College</u>** (askham-bryan.ac.uk/courses/foundation-learning) or contact the College on 01904 772277 for more information about the following courses or on taster day events.

Entry I Independence and Employability Skills: A fun and bespoke programme tailored to meet individual student needs who may not be ready for a full-time vocational pathway and require a little extra support. This course will help you develop key transferable skills and knowledge for living independently and social development. You will access community facilities, participate in group work experience placements and develop confidence working with animals in the College's wildlife park and farm.

Entry 2 and Entry 3 Skills for Working Life: This course will help you develop a range of transferable skills, explore campus facilities, work with the animals in the wildlife park and farm, and offers trips, guest speakers and group off-site work experience. You will study through a mix of practical and theory sessions.

Step Into: This programme is aimed at learners ready to upskill their industry, professional and personal skills. You will develop these skills by participating in off-site projects, accessing the facilities on campus in the animal wildlife park, working farm, equine yard and horticulture department working towards essential reflective skills including teamwork, sustainability and study skills. The programme includes a mandatory group work placement off-site to further stretch and challenge developed skills in a safe and supportive environment.

Level I Pathways: Take your first steps on the career ladder and study a level I Diploma Land-Based Programme; you can select a specific pathway of either Agriculture, Animal Care, Equine, Sport or Conservation. There is a focus on practical skills, but the programme will also develop your academic skills over the year. There are no formal exams, you will be assessed over the course completing a range of practical and written tasks. This course will help you develop transferable skills that employers are looking for and improve your personal performance through 60 hours of work experience in a relevant setting.

Stepping Stone and Level 2 Pathways: After a year of study at level I, many students progress onto level 2. This can be in the mainstream section of the college. However, for those who are not ready for the demands of a full level 2 qualification, there is the unique opportunity to study on the Stepping Stone Programme. Stepping Stone is a level 2 qualification in Animal Care or Land-based Studies. You would be awarded a level 2 certificate from City and Guilds, or the Open College Network on completion. You will

broaden your existing vocational skills, develop your ability to study independently, explore career routes within the industry and boost your confidence. You will also undertake 75 hours of work experience in a setting that is relevant to your qualification.

The King's Trust TEAM Programme (12 weeks, 3 start dates a year): This programme challenges you to develop self-confidence, interpersonal and employability skills. It includes a one-week residential and a two-week work placement and gives you the chance to contribute through community projects. You will also get support to find work, become self-employed or progress to further study.

Kick Start: This programme offers students a unique opportunity to step confidently into mainstream college life in a supportive and inclusive way. This dynamic 12 week programme is designed to smooth the transition from school, inspiring learners to develop the skills, knowledge, and behaviours they need to thrive in a college environment. Students will be encouraged to explore and benefit from the full range of campus facilities, building independence and confidence as they prepare to progress onto a full-time study programme the following academic year.

York Learning (Routes 2 Success)

Routes 2 Success is a supportive full time study programme. This may be the course for you if you are aged 16-19 (or up to 25 with an EHCP) and not yet ready to access mainstream post-16 study and find you learn more effectively in a small group setting. The programme aims to build on your personal and academic skills, supporting your transition to further education, training or work. You can study English and maths from entry level Functional Skills to GCSEs alongside a City & Guilds qualification in employability skills, as well as undertaking a work placement. The programme also supports you to develop your personal and social skills alongside life skills, preparing you to positively progress into adulthood.

For more information contact sarah.robson@york.gov.uk (07534 042146) or alison.thorne@york.gov.uk (07796 818184)

York Learning also provides free courses for people aged 19+ without GCSE grade 4/C and above to gain Functional Skills or GCSE qualifications in English and maths. **See page 37** for further details.

Additional Learning Options for Students with an EHCP

Supported Internships

A Supported Internship can be a good way to develop your independence, confidence and the skills valued by employers.

A Supported Internship will typically last between 6 months and one academic year. Whilst you are not paid during the programme, you will benefit from being part of a real business and develop skills to help you secure paid employment or an apprenticeship. You may also undertake further employability skills training and English and maths if required.

It is mainly based at the employer's workplace, where you learn on the job with support from a Job Coach and Tutor. If you learn best by 'doing' and are ready to work but need extra support to take that step, a Supported Internship may be right for you.

More information regarding local opportunities is available on the <u>York SEND</u> <u>Local Offer</u> (yorksend.org/preparing-work/supported-internships) website and go to **pages 30-40** to see which local providers offer Supported Internships.

What I like about it is that we get a feel for what it's like to be in a working environment. I think it helps us prepare for when we get a job in the future.

- Intern

The provider has been amazing in the support and guidance they have given to our son. The work coaches and tutors have got him to focus and allow him to discover his career potential. They have helped him to grow as a person and equipped him with life skills that will aid him in obtaining employment and living independently in the future.

- Parent

Personalised Learning and Work Experience Programmes

These programmes focus on work experience and include a tailored package of learning which prepares you for employment (or volunteering) and independent living, building towards living a full adult life in York.

This pathway could be appropriate for you if you want to continue your education when you leave school in a vocational setting or if your needs cannot currently be met by other programmes offered locally.

It combines three elements:

- Education and training (including English and maths) with a local provider, including the opportunity to gain further qualifications and employability skills.
- A period of work experience or volunteering doing something you are interested in. This will help you build your CV and strengthen your employability skills.
- Independent living skills to enable you to gain skills for everyday living and being part of your local community.

See individual websites for more information and timings.

Year II Taster Days

On 13 and 15 January 2026, York school sixth forms and colleges will be offering taster days for Year 11 students to trial post-16 options. On 15 January 2026, there will also be the option of attending a taster day with local construction employers to learn about routes into construction careers. Applications usually open in early October and the deadline is usually end of November (unless otherwise stated). Ask at school for more information about the Year 11 Taster Days.

Ad Astra

At Ad Astra, there's no one-size-fits-all. They offer a supportive, flexible environment shaped around you — your needs, strengths, and future. Whether you face behavioural challenges, have additional needs, or haven't found the right fit elsewhere, they welcome you with an open mind. With support from a wide network of agencies, Ad Astra ensures you're never on the journey alone.

Get Stuck In: Led by expert tutors, you'll get handson with mechanics, construction, small animal care, and painting and decorating. New for 2025–26, their Wheldrake site introduces large animal care — think horses and goats — helping you build real-world skills and confidence in a calm, outdoor setting. Ad Astra also runs exciting activities year-round: swimming, sports, bouldering, gym, clay shooting, cooking, creative arts — always something new to try.

Skills That Set You Up for Life: Ad Astra's team delivers English, maths, and PSHE (Personal, Social, Health and Economic Education) in creative, accessible ways, helping you gain qualifications and life skills. Two-thirds of students passed their exams last year — and they're growing stronger. PSHE comes to life with visits from emergency services, health teams, and more.

Independent Skills for Life sessions: These prepare you for adulthood — covering budgeting, cooking, driving, tenancy, personal care, time management, and travel. Whether you're heading to supported housing or just want to feel more confident at home, they've got you.

Your Future, Your Way: They don't just teach — they launch careers. Ad Astra's specialist employability team can support and connect you with meaningful work placements across York. With partners in a range of industries, they will help you build the skills to thrive.

Specialist Provider

Askham Bryan College

Askham Bryan college is a mainstream further education establishment, offering you the opportunity to study a land-based pathway. They offer courses from entry 1 right up to degree level if you are aged 16-25.

The Foundation Learning department offers a nurturing environment located in the heart of the campus. This allows for adaptive teaching opportunity whilst maintaining high expectations for all, so that you have the opportunity to meet expectations. It is home to well-qualified and experienced staff to ensure you follow study programmes, including a full range of land-based routes offering progression onto higher-level courses.

Effective learning support ensures that you develop the knowledge, skills and behaviours you need for further learning and preparation for adulthood. This includes employability skills through your vocational qualification and access to specialist work related resources in each curriculum area and the wider community.

They have excellent links with local schools and a wide range of external agencies enabling a strong lead to excellent support for transition into college.

Blueberry Academy

Blueberry provides Personalised Learning Programmes in Preparation for Adulthood (PFA), supporting young people with EHCPs to develop greater independence and employability. Personalised Learning PFA Programmes are usually for 2 years and include Functional Skills, Independent Living Skills, Employability Skills, Citizenship and Wellbeing and supported work experience. Programmes can also include weekly visits to David Lloyd gym, and participation in a wide range of activities in the local community.

Blueberry has "in-house" supported work experiences in the Blueberry and Linkage Charity Shop, Crafts Workshop, Community Enterprise and Garden Care Team. Blueberry works in partnership with local employers to offer work placements in a range of sectors including retail, catering, hospitality, administration and IT. You are supported by a Job Coach to work as independently as possible.

The Blueberry team aims to support you to plan for your future. You are encouraged to aspire to employment, maintain volunteering opportunities, be part of the local community and continue with a routine of healthy and positive social and leisure activities beyond education.

Blueberry also offers a range of Blueberry Social Clubs and activities for you when on programme.

You have an allocated Information, Advice and Guidance worker to help you achieve your goals and support personal development.

Some students progress to a 3rd year Supported Internship. This is a I-year education programme with a clear goal of paid employment. You spend a minimum of 2 days a week with an employer and continue with Blueberry education for I or 2 days a week in Functional Skills and Employability. A Blueberry Job Coach provides you with support in the workplace.

Some students progress to Blueberry Supported Employment service, through Social Care, where you can continue to develop employability skills through work experience.

Choose 2

A personalised learning programme that supports young people with disabilities and additional needs. Choose 2 supports you to build on your skills and knowledge to become as independent as possible through personal and social development. This will prepare you for adult life and work options.

Choose 2's Independence and Life Skills programme usually runs for 2 years and includes Functional Skills, employability, independent living, good health, friends, relationships and community and enrichment sessions such as sport, art, music and volunteering.

They also offer an in-house work experience option working in one of their cafés.

NHSE Choices College

NHSE Choices College (previously known a Project Choice) is a one-year Supported Internship programme. You will do three I2-week placements during the year and spend up to 4 days in placement, with one day spent in the classroom completing employability skills, STEM sessions and Functional Skills maths and English. There is a possibility of a different placement each term.

Some placements are in an NHS setting and some are in the community. You are allocated a workplace mentor along with the coordinator. You won't get paid but will develop useful work-related skills and be more ready to move into paid work at the end of the programme.

During the employability sessions, NHSE Choices College also looks at building/updating your CV, practicing interview skills and job searching.

Prospects (part of Shaw Trust)

A Supported Internship is a study programme if you are aged 16 to 24 with an Education, Health and Care Plan (EHCP) and want to move into employment but need some extra support.

They usually last for a year, with the opportunity to complete three different placements. Supported Internships give you an opportunity to take your first steps into the world of employment, build skills in the workplace, gain qualifications and get a paid job.

The Internships offer a unique mix of education and job coaching in a range of different roles, including retail, hospitality, catering, customer care, admin, gardening etc. Other placements can also be found to cover other career areas.

Support from a Job Coach is provided to help develop your skills for the workplace and prepare you for moving into paid employment.

Prospects offer a Gateway Progression award, the opportunity to study towards Functional Skills English and maths from entry level to level 2 if required and other vocational qualifications can also be offered.

Job Coaches also continue to offer support to look for paid employment after the programme ends and ensure you are settled with your new employer.

Routes 2 Success (York Learning)

Age 16-18 and not sure what you want to do next? Do you feel that college or an apprenticeship isn't for you?

If you are a young person, with or without an EHCP, looking for your next steps in education, the 'Routes 2 Success' programme will enable you to move into adulthood with confidence and resilience.

Routes 2 Success is a one-year programme for a minimum of 3 days per week. You will study English and maths as well as a City & Guilds qualification in Employability Skills designed to support you to get ready for the world of work.

There are also dedicated personal and social development and life skills curriculums to support you to develop your skills, confidence and resilience as you move on into adulthood.

You will have the opportunity to participate in a work placement or work tasters, which will be planned with your needs in mind. Classroom study is in small groups with a variety of projects and enrichment activities to equip you for independence and to engage and motivate you to succeed, and their dedicated learner support team is always on hand to support with any additional support requirements.

Smart-Ways (Tang Hall SMART CIC)

Smart-Ways is for you if you enjoy music, art, drama, dance or sport and you want to either work in related industries one day, or progress to university.

Level I

Smart-Ways offers a combined programme of music, drama, dance, art and sport. You can access the programme if you are working at entry levels of literacy and numeracy, providing you are enthusiastic.

Level 2

Their Level 2 blended performing arts diploma is an equivalent of 4 GCSE grades and develops skills in music, dance and drama.

Level 3

If you have already built-up considerable skill in music, drama or art, they can offer you the chance to study a full level 3 Diploma in a supportive and stimulating environment. This is worth 3 A Levels and is an acceptable entrance-qualification for many universities.

Once you have attained your qualification, there is an option to gain music or arts-industry employability skills on a Supported Internship programme and benefit from a range of in-house and external work placements. Then, their charity (Tang Hall Employment) supports you into your first paid employment.

There are opportunities to get involved in many concerts and events, and to be part of a friendly and supportive community, where everyone is welcome, and your individuality is celebrated.

United Response

United Response Education offers personalised learning packages and Supported Internships for post-16 students with an EHCP.

Their goal is to empower you to become more independent and confident as you prepare for adulthood, focusing on developing essential life skills through academic learning and real-world experience. Teaching is delivered one-to-one, and in small group work, and you will have the opportunity to work towards Functional Skills or GCSEs in English and maths, while gaining hands-on experience in a variety of sectors (see below)

- » Media Personalised Learning Packages (2–3 years): If you are interested in developing skills in creative and digital fields, with the aim of progressing into paid work. Areas of specialism include filmmaking, post-production, music production, podcasting, photography, coding, game design, art, and graphic design. You work at your own level, explore freelance opportunities, and gain work placements.
- » Work-Based Personalised Learning Packages (2-3 years): If you need additional time to build essential, work-ready skills. It provides a structured environment to explore career interests and grow in confidence. You gain hands-on experience in real workplace settings—including time at Café West, where you develop skills in hospitality, food preparation, and customer service.
- » Supported Internship (I year): If you complete either of the above programmes, and you're nearly ready for work, you may progress into a Supported Internship. It offers placements in sectors such as media, hospitality, retail and administration with support from a Job Coach. You gain real-world experience while preparing for the transition from education into employment.

How to Apply

Contact United Response to make referrals. Applications must be submitted by May 2026.

York College (FE/HE college)

York College aims to ensure that if you have learning difficulties and/or disabilities you can enrol on your chosen course, from entry level to level 3, including A Levels and T Levels; as well as higher education courses (if entry criteria is met).

The Pathways to Work and Independent

Living course is ideal if you are working at entry level 2, entry level 3 and level I and may require a personalised approach to learning. The programme is supported with a high ratio of staff to students and is delivered through a combination of theory, practical sessions, visits, speakers, and work placements. Each individual course lasts one year, and you may be entered for entry 2, entry 3, or level I at the start of your time at college, depending on ability and prior achievements. You will study a range of units to develop skills that prepare you for both work and living independently.

They focus on helping you to prepare for adult life and develop the skills and confidence to achieve progression to other courses, Supported Internships and work. The programme also encourages you to develop personal, social and communication skills, offering an excellent opportunity to belong to a small, supportive group of students within the context of the wider college setting. You will study English and maths at a level suitable for your needs, including working towards an award where appropriate. Progression onto GCSE English and maths is available for some students which includes joining classes in the wider college community.

Further Support

Inspiring Choices

Inspiring Choices is a higher education outreach partnership delivering impartial careers information, advice and guidance to young people across York. On their website you will find a range of resources designed to support you in navigating school, further education and higher education. This includes resources and information for young people who may benefit from additional support.

There are also resources for parents/carers to enable them to help you to make decisions about your future.

For more information, visit <u>Inspiring Choices York & North Yorkshire</u> (inspiring-choices.co.uk)

Remember to

- » Talk to your school's careers advisers or local careers services to find out what is available for you.
- » Involve your parents or carers in your decisionmaking process. Their support and perspective can be invaluable.

Take the time to research your options and plan your next steps carefully. Utilise the information in this booklet and resources at the end of the guide.

Looking Ahead: Employment and the Job Market

People with the skills and qualifications that businesses need are generally better paid and have more job options. Continuing in education and training helps you to develop skills, gain qualifications and get ready for the world of work. This includes going straight into an apprenticeship or job with training between the ages of 16 and 18. An apprenticeship is a job with training (see pages 15-20) and is often a clear route to progress a career. Any employer should support and encourage access to training.

The National Careers Service has developed a <u>skills assessment</u> (nationalcareers.service.gov.uk/discover-your-skills-and-careers) to help you to identify your interests, motivations and preferences. You can use this information to explore careers that might interest you in more detail. You can also <u>explore different careers</u> (nationalcareers.service.gov.uk/explore-careers) to find out what a job involves and if it could be right for you.

The local picture

In recent years, the number and types of jobs available in York have changed. You may know people who have changed role, the hours they work or their employer. Having digital skills has become considerably more important.

A key change is that more people now regularly work from home, as well or instead of going to an office. However, many roles still rely and thrive on people delivering a personal service such as in health & social care, education, retail, logistics and hospitality. Many science, technology, engineering and maths (STEM) roles also require employees to use manufacturing, engineering and laboratory equipment at designated sites.

The jobs market in York remains competitive; as well as young people leaving school, college and university, more people are looking to change jobs or return to work. This means that personal qualities such as adaptability, a willingness to learn and resilience are more important than ever.

Whilst it's good to have a clear idea of next steps, you may have no firm career plans in Year II. So, now's the time for you to think about developing the transferable and technical skills that employers need. With the fast pace of change in business and industry today, you will need to put yourself in the best position to meet the needs of employers now and in the future.

Employers across all sectors value basic literacy, numeracy and digital skills, along with transferable skills such as self-management. In terms of key skills that employers are looking for, they can be broken down into two categories: baseline and specialist.

The most sought after baseline skills (order of demand)	The most sought after specialist skills (order of demand)
Communication	Customer service
Customer service	Teaching
Management	Teamwork/collaboration
Attention to detail	Marketing
Sales	Finance / Invoicing / Accounting
Planning	Auditing
Leadership	Project management
Problem solving	Supporting young people with mental health conditions

Most sought after baseline digital skills (order of demand)	Most sought after specialist digital skills (order of demand)
Microsoft Office Suite	SQL
Microsoft Excel	Microsoft C#
Microsoft Outlook	Microsoft Azure
Microsoft PowerPoint	JavaScript
SAP Applications	Amazon Web Services

Data source: York & North Yorkshire Labour Market Analysis 2023, YNYLEP

So, when deciding to live and work in York, you'll need to know about:

Local employers

York has some big employers in the city but most are small to medium sized companies (SMEs) with fewer than 250 employees. Self-employment and starting your own business are also real possibilities, but it's important for you to understand the sector you wish to operate within and who your customers will be.

Good Business Charter

In York, some employers are signed up to the Good Business Charter (GBC). This means they have committed to ten responsible business practices, which include paying the Real Living Wage, offering fair hours and contracts, to source products ethically and are committed to reducing their carbon usage.

A list of <u>York based employers</u> that are signed up to the GBC can be found online (york. gov.uk/council/good-business-charter-organisations-york).

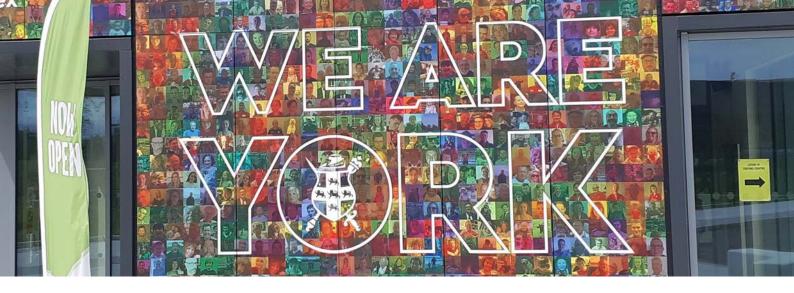

Job opportunities

Current predictions are that the biggest growth in job opportunities in York will be for those people whose qualifications are level 3 or above (see pages 9-11), which is equivalent to A Levels, T Levels and BTECs, Certificates, Diplomas or Advanced Apprenticeships. This means that those who continue to study or train beyond the age of 18 should be in a stronger position. This could be at a university or other higher education institution, through a higher/degree level apprenticeship, or by gaining professional qualifications while working.

Support and preparation

The <u>National Careers Service</u> (national careers. service. gov.uk) provides support on applying for jobs, preparing for interview, creating a CV and covering letter. Some tips are listed below:

Top tips when applying for jobs	Top tips when preparing for interview
Have your information available when you start your application, for example qualifications/predicted grades, any work history and referees.	Be punctual – allow enough time to get to your interview. If you don't know where to go, ask for directions in advance.
Have a genuine interest in the position you are applying for.	Pick out something suitable and comfortable to wear.
Read the job description carefully and link your answers to the key elements of the job description.	Turn off your phone.
Do your research and demonstrate what you know about the company.	Take a copy of your CV / application with you to remind yourself of what you said.
Follow any instructions carefully.	Sit up straight, keep calm and be yourself.
Try to link in with your work experience, volunteering, leisure activities, clubs and school/college experiences.	You can ask the interviewer to repeat a question – take your time to think before you answer.
Always be honest and use Artificial Intelligence (AI) responsibly and ethically.	Speak clearly.
Do not rush – make sure you do a spell check and proof read your application.	Do not interrupt the interviewer.
Have a sensible email address and include up to date contact details.	Do prior research on the organisation and make a note of questions to ask.
If applying online, make sure you click on the 'submit' button.	Practise answering interview questions with a friend or relative.
Think about including/attaching a covering letter with your application.	Thank the person for the opportunity.

Employment sectors in York

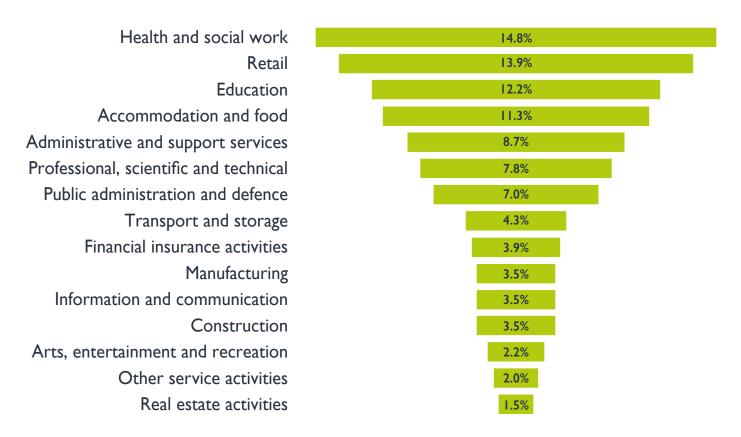

York has a number of different employment sectors, which include a wide range of different jobs and occupations. Whilst each sector has its own specialist occupations (see the table below), businesses in all sectors need people who work in finance, IT, marketing, legal and other areas.

Some examples of specialist occupations in York's key employment sectors:

Employment Sector	Examples of Jobs
Construction	Joiners and Surveyors
Early Years	Early Years Specialist Teacher and Teaching Assistant
Health and Social Care	Care Worker, Counsellor and Dentist
IT and Digital	Cyber Security Technician, Coder and Software QA
Tourism, Hospitality and Retail	Head Chef and Logistics Manager
Engineering (including food manufacturing, rail and road transport)	Engineer, Food Production Operative and Rail Signalling Engineer
Creative and Communications	Graphic Designer and UX Developer
Heritage	Digital Preservation Archivist and Stone Masons
Agritech, Bioeconomy and Life Sciences	Microbiologists Research and Laboratory Technicians
Business and Professional Services	Lawyer, Insurance Broker, Business Relationship Manager and Planner

It's important to be aware of the key employment sectors in York and consider the progression opportunities an entry-level role may offer. For instance, building a career within the hospitality sector could lead to a national or international management role.

York's employment market:

Data source: 2023 Business Register and Employment Survey

Whilst it is important to understand the job market in York, you might want to look further afield. Think about your chosen method of transport and the time it will take you to get there, rather than the distance.

The Shape Your Future York & North Yorkshire booklet provides information about the key local employment sectors, qualifications and pathways, the importance of skills and making successful applications. Ask at school to see a copy of the 2025/26 booklet.

Green jobs and green skills

You may have heard about 'green jobs' and 'green skills' but are uncertain what the difference is or how important they are for working in York.

A 'green job' is employment in an activity that contributes to our net zero emissions target and other environmental goals, such as nature restoration and mitigation against climate risks. Examples include renewable energy generation, woodland creation and flood defence.

Did you know?

In York, we have an ambition to be a net zero carbon city by 2030. We all have a part to play and this includes developing green skills.

'Green skills' are needed in a variety of roles and across different sectors. Increasingly employers in York are looking for people with skills such as innovation, adaptability and resilience to help them make their business activities more environmentally friendly.

Technical green skills are also in demand in areas such as construction and transport. For instance, plumbers and electricians will need to know how to fit environmentally friendly air source heat pumps and car mechanics will be needed to fix electric as well as petrol cars.

At the same time, new technologies continue to change the world around us and it's possible that the job you'll be doing in 20 years' time doesn't yet exist! So, like today's plumbers and car mechanics, you'll need to be prepared to learn new skills along the way.

In addition the <u>Green Careers Hub</u> (greencareershub.com) is a platform to access resources and careers information that relates to your current and future skills, knowledge and experience.

Volunteering

There are lots of opportunities across the city for you to try something new, develop your skills, enhance your CV, meet new people, have fun and give something back to your community. Your school will be able to advise on the opportunities available.

To find out more about how to get involved in volunteering, see page 57.

Higher education is from level 4+ (see pages 9-II) and you can study at universities, colleges, independent training providers and some further education institutions.

You can progress to higher education (HE) with a range of qualifications, including A Levels, BTECs, Diplomas, T Levels and Apprenticeships. It is important to recognise that some courses ask for specific qualifications. Teachers and advisers at schools will be able to tell you which subjects may be useful when picking options for HE, alternatively visit UCAS (ucas.com/explore) or Informed Choices (informedchoices.ac.uk). Information about course entry requirements is available through university and college prospectuses and websites.

Generally, total earnings over a lifetime are higher for those with HE qualifications and there are many other positive experiences and benefits to be gained from studying at a university or college. If you know the type of job you would like to do after studying, look at job adverts and applications to see if they ask for specific qualifications.

It is also possible to apply for deferred entry onto HE courses, which allows you to secure your place on a course whilst you gain valuable work experience or travel.

Studying in York

Est. 1841 YORK ST JOHN UNIVERSITY

York has two universities (the University of York and York St John University) and two colleges (Askham Bryan College and York College), all offering a wide range of HE courses, both academic and work-based, including degree-level apprenticeships and foundation degrees. Further afield, there are around 400 providers across the country offering over 50,000 courses (see UCAS details on pages 51-52 and 59), so there should be a course to meet your interest.

Costs and financial support

The below information is based on the 2025/26 academic year.

Universities and other HE providers in England can charge up to £9,535 per year. No fees are paid up front, and fee and maintenance loans are available depending on your financial situation. You do not start repaying your loan until you are earning at least £25,000 per year. There may be additional support available to you if you are care-experienced and are looking to progress to higher education. This includes a bursary of £2,000 to help with the costs of books and materials, and support to pay for accommodation costs.

For more information see:

- » Local Offer For Care Leavers (york.gov.uk/LocalOfferForCareLeavers)
- » <u>Undergraduate Tuition Fees and student loans</u> (ucas.com/money-and-student-life/money/student-finance/undergraduate-tuition-fees-and-student-loans)
- » Financial support (gov.uk/student-finance) including a simple calculator
- » Making repayments (gov.uk/repaying-your-student-loan)

Disabled Students' Allowance (DSA)

This is available to support HE students with a range of disabilities and conditions. Allowances and support available through DSA are tailored to individual needs through a personal DSA Needs Assessment. Assessments can be carried out locally to where you live or plan to study.

Find out more information on DSA (gov.uk/disabled-students-allowance-dsa).

Where to find out more

Universities and colleges in York offer a range of opportunities to visit them. Open days will allow you to look around, find out more about courses and meet staff and current students. Open days typically run between July and December. To find out more about when open days are being held, please check on the following websites:

- » York St John University (yorksj.ac.uk/study/undergraduate/meet-us/open-days) places must be booked online
- » <u>University of York</u> (york.ac.uk/study/undergraduate/visits/open-days) places must be booked online
- » <u>Askham Bryan College</u> (askham-bryan.ac.uk/university-centre-open-days)
- » York College (yorkcollege.ac.uk/events-and-news/events/openevents)

Looking Ahead: Lifelong Learning

When you're thinking about your next steps, don't forget that lifelong learning includes your parents/carers and older siblings. Lifelong learning can improve our life and work skills, enhance our understanding of the world around us, provide us with the skills and opportunities to move up the career ladder and improve our quality of life.

There are many reasons why it is good to come back to learning:

- Learn new skills and build knowledge, whether it's for leisure or work
- Improve your employment options
- Improve your self-confidence
- Build skills for a new career, whether business orientated or creative
- Meet new people and become part of a community of learners
- · Keep up with the kids in maths, English and digital skills
- Because it's fun!

Are you aged 19+ and stuck in a rut with work or looking for employment?

York Learning has one mission: to inspire you to learn, explore and achieve. Wherever you have come from or whatever your next steps are, York Learning can help you explore your options, support you to make the right choices, and find your way into something new.

If you are thinking about returning to learning or are in work and looking to improve your career prospects, York Learning's skills courses open better career options and more confidence in your abilities. They will support you to find your next steps and can provide many academic courses for free. If the course you want to do isn't funded, they can often provide support with course fees, equipment and anything else that would enable you to access learning.

English, maths and digital skills courses

Improve your skills with English and maths from beginners to GCSE and digital skills up to level 3. Contact York Learning to arrange a one-to-one skills assessment and get started on a course that's at the right level for you.

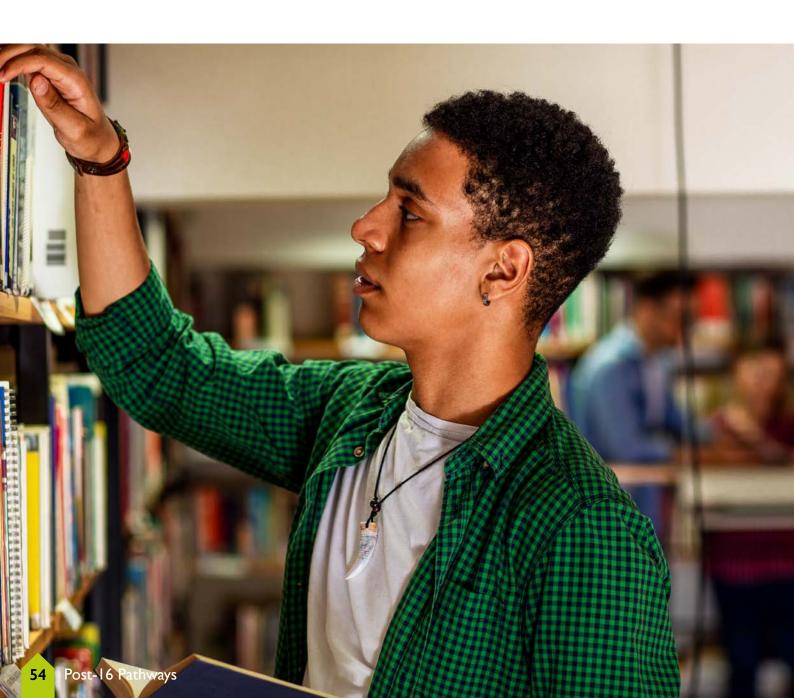

Careers information, advice, and guidance

If you're looking for work, a new job or new skills for a career change, get support with one-to-one mentoring and/or career advice and support. For information on the financial support available to help parents and carers with the cost of childcare, see page 64.

York Local Offer - Care Leavers

(york.gov.uk/LocalOfferForCareLeavers)

Higher Education bursary and support available for care leavers.

Useful contacts for young people with SEND or an EHCP

York SEND Local Offer (yorksend.org)

The York SEND Local Offer is a website which sets out services and activities available to children and young people with Special Educational Needs and Disabilities; support is available from birth to 25 years old. This website also provides helpful information for families, and resources for professionals working in SEN services.

Adult Social Care (york.gov.uk/adultsocialcare)

Accessible Information about Adult Social Care is available on the City of York Council website at: york.gov.uk/ASCAccessibleInformation

Jobcentre Plus (gov.uk/looking-for-work-if-disabled)

Work Coaches can advise benefit claimants on job seeking, training, new skills and government schemes. They can also tell you about local disability-friendly employers. Work Coaches have access to Disability Employment Advisers and a Youth Employment Coach who may be able to give more specialist advice and support.

Live Well York (livewellyork.co.uk)

As you move towards adulthood, this website has information on local leisure and social activities.

Local Area Coordinators (york.gov.uk/LocalAreaCoordination)

Local Area Coordinators help you stay safe, well, independent and connected to your local community by:

- » helping raise awareness of available resources
- » providing links to local services
- » supporting people with a wide range of issues
- » developing resilience and social inclusion in communities

Local Area Coordinators work with individuals and families of all ages and abilities. They take time to get to know you, your family, friends, carers and your community, so they can help you to build a strong support network.

Parent Carer Forum York (parentcarerforumyork.org)

The Parent Carer Forum York is an independent charity made up of parents and carers of children or young people with additional needs or disabilities (0-25) who live in York.

Preparing for Adulthood (PFA) (yorksend.org/preparation-adulthood)

Visit the Local Offer website to find out more about preparing to be an adult in York and preparing for work. There are a number of teams who can advise you and your parents/carers as you look towards your future. Teams include Specialist Learning & Employment Advisers, Social Workers from Adults and Children's Social Care, York Independent Living and Travel Skills (YILTS), SEN and colleagues in Children's and Adult Health.

These teams work with colleagues across the Local Authority (LA) as well as within health and the voluntary sector and in local communities to achieve this.

To find out more visit the Local Offer website (yorksend.org/team-city-york-council)

Raise York (raiseyork.co.uk)

Raise York is a network of people, places and online support. It supports you and your parents and carers with information from pregnancy to adulthood. You can expect a warm welcome in your local community and to be guided to the right support for you.

Scope (scope.org.uk/advice-and-support/work-careers)

A free careers advice service if you are aged 15-25 in England and Wales and you are disabled or have an impairment or condition.

SENDIASS (york.gov.uk/SENDIASS)

Special Education Needs and Disability Information, Advice and Support Services (SENDIASS) provides information, advice and support to you and your parents/carers in relation to special educational needs and disability and related health and social care issues. The service is free and can be provided over the telephone, during home visits or through support at meetings.

Sport and Active Leisure (york.gov.uk/InclusiveSports)

If you have a disability or additional needs, there is help for you to achieve your recommended 150 minutes of physical activity per week to boost your health and happiness. A wide variety of sports and activities are available, including goalball, boccia, wheelchair basketball and cycling on adapted bikes.

Yiksaaa (facebook.com/YIKsAAA)

A dedicated site to All Things Autism in York, including autism clubs, holiday clubs and training for parents. YIKSAAA is part of York Inspirational Kids.

York Family Information Service (FIS)

(raiseyork.co.uk/york-family-information-service)

York FIS provides free and impartial information to any family and young person from pregnancy up to 19 years (or up to 25 years you have special educational needs or disabilities) living in York.

Information includes:

- » support finding Ofsted registered childcare including for children with SEND
- » services, groups, and activities for families, children and young people 0-25 years
- » services to support families who have children with additional needs and disabilities
- » free newsletter aimed at families living in York

York Inspirational Kids (YIKS) (yiks.co.uk)

Offers a range of support through groups and activities if you have a learning or physical disability, autism or other neurodivergence.

York Special Educational Needs Service (york.gov.uk/SEN)

Information on what's available in York for you and your parents/carers if you have SEND, with or without an EHCP.

General Team Contact: sendept@york.gov.uk

Financial Support

Depending on your family circumstances and what you choose to do, there may be extra financial support to help you continue in full-time education and other training programmes. The following information is correct as of September 2025.

You may need some financial support to help stay in publicly funded education or training after 16 through to the age of 19 and you can apply to your intended school sixth form, college or training provider for support from this fund.

16-19 bursary for students in vulnerable groups, worth up to £1,200 per year. You may be eligible for this bursary if at least one of the following applies:

- · you're in or you recently left local authority care,
- you get Income Support or Universal Credit because you're financially supporting yourself,
- you get Disability Living Allowance (DLA) in your name and Employment and Support Allowance (ESA) or Universal Credit,
- you get Personal Independence Payment (PIP) in your name and ESA or Universal Credit.

Source: GOV.UK <a>16-19 bursary fund (gov.uk/1619-bursary-fund/eligibility)

A bursary is money that you, or your education or training provider, can use to pay for things like books, equipment and course trips. It can also help with travel costs to school or college and provide meal credits. Education providers manage the bursary differently so it is best to check with the funding department when applying.

16-19 discretionary bursary if you need financial help and do not qualify for a bursary for students in vulnerable groups. Your school or college will have their own criteria for discretionary bursaries. They'll look at your individual circumstances - this usually includes your family income. Ask student services about their criteria and any evidence you'll need.

You can apply to a discretionary bursary if you're over 19 and either:

- continuing on a course you started aged 16 to 18 (known as being a '19+ continuer')
- have an Education, Health and Care Plan

Your provider will decide how you get your bursary. You might be paid in full or in instalments, or more typically payments are made 'in kind' for travel passes, free meals and/ or to pay for books. For more information visit GOV.UK 16-19 bursary fund/eligibility).

Apprenticeship bursary for care leavers of £3,000 is available to you if you are in care and/or are an eligible care leaver if you start an apprenticeship before you turn 25. It is payable in instalments over the first year of your apprenticeship. For more information and eligibility visit: Apprenticeship bursary for care leavers (gov.uk/government/publications/apprenticeships-bursary-for-care-leavers/apprenticeships-care-leavers-bursary-policy-summary)

Care to Learn

The Care to Learn scheme can help with childcare costs while you study. You must be aged 19 or under at the start of your course, and be the main parent or carer for your child.

You can get up to £180 per child per week to help pay for childcare, place holding over summer and related travel costs while you remain in learning. Care to Learn is available for a variety of courses, full and part-time and is paid direct to the Ofsted registered childminder or nursery from the education provider. For travel expenses, your education provider will either reimburse you or make arrangements for your travel. For more information and to apply, visit GOV.UK <u>Care to Learn</u> (gov.uk/care-to-learn).

Also, the financial support that is available to parents and carers to help with the cost of childcare is increasing. These include major changes to make it easier for parents and carers with childcare responsibilities to move into or take on more paid work. From September 2025, working parents with children aged 9 months old to when they start school will be eligible for 30 hours childcare support. For more information, visit Childcare Choices (childcarechoices.gov.uk).

Higher education bursary and support for care leavers

There is support available to you if you are looking to progress to higher education, depending on your care leaver status. As long as higher education is part of your pathway plan you will have access to a £2,000 bursary if you start university on an undergraduate degree course. This bursary is there to help with essential items for your course and to help you experience university life. There is also financial support towards accommodation costs. This financial support is accessed through your Pathway worker, for more information on the full offer visit Local Offer for Care Leavers (york.gov.uk/LocalOfferForCareLeavers).

Child Benefit and Child Tax Credits

If you continue in education, your parents or carers should be able to continue claiming Child Benefit until you turn 20. If you leave education but return before your 19th birthday, they can start claiming again until you turn 20. If you are already 19, you need to have either started the course or been enrolled or accepted on it by your 19th birthday. For more information, visit GOV.UK Child Benefit (gov.uk/child-benefit). Household/parental benefits may be affected if you take up employment, including an apprenticeship.

Help with transport

There are various schemes to help with the cost of your transport to college or sixth form, provided certain conditions are met.

If your family is on a low income and you live over three miles from the institution, you may be entitled to a free bus pass. You may also apply for assistance as an independent student without regard to parent/carers' income according to set criteria. Students with any special needs that require assistance with transport will be assessed on an individual basis. For full information, visit <u>Transport To School or College</u> (york.gov.uk/ TransportToSchoolOrCollege). Individual institutions may also be able to provide help with transport. See their websites and literature for further information.

Help with transport if you have an EHCP

If you have an EHCP you may be entitled to further support with travel such as a place in a taxi/minibus or a Personal Travel Budget. You will need to visit <u>SEN home to school transport</u> (york.gov.uk/ school-transport/travel-school-college/2) for details of how to apply and you will need to apply for each year you remain in education.

York Independent Living and Travel Skills (YILTS) offers travel training and can assess your travel skills if you are aged 11-25 years old and currently access City of York Council funded transport.

YILTS supports you to understand timetables, plan routes, become familiar with being out and about, and understand what to do if something unexpected happens. You may be asked to undergo a practical assessment to determine your longer term need for transport support.

YILTS also receive referrals from a range of professionals, parents/carers and young people. Training is provided at a time that is right for you and YILTS staff attend EHCP meetings in school to help agree travel plans, e.g. as you can move on from school or college.

For more information, visit <u>YILTS</u> (yorksend.org/team-city-york-council/york-independent-living-transport-skills-yilts).

Free meals

The free meals entitlement covers school sixth forms, colleges and some other post-16 provision. To be eligible, you need to be aged 16-19 and you or your family needs to meet criteria relating to receipt of benefits.

If you are aged 19 or over, you are only eligible to receive a free meal if you are continuing on a study programme you began aged 16 to 18 or have an EHCP. Please speak to your school, college or training provider for further details.

Other support and help

There are different sources of support available, see pages 55-62 of this guide.
