Economic and Retail Growth Analysis and Vision Work City Conversations Consultation Feedback

The City Conversations Consultation Feedback

This report has been compiled to record the process and feedback from the consultation process. This report forms part of the evidence base for the development of the York Economic and Retail Vision and the Local development Framework.

Strategic Aim for the City conversations

- To engage with members, business and the residential community.
- To encourage meaningful and structured debate regarding the next 15 years of economic growth and change in York.

Members Briefing

Presentation to Members

A presentation and feedback session was held with Members on the 26th November.

The presentation included:

- Details of the scope of the Economic Analysis and Visioning exercise
- City Conversation methodology
- City conversation summary key thoughts and themes

Members were also invited to comment on the suggested Vision, and feedback has been recorded within this report.

Business Conversations

Face to face conversations with key business representatives and stakeholder groups have been held to stimulate debate and generate feedback

Focused stakeholder meetings have been held in 'round table' discussion format. Including the following meetings:

- Local Plan Visioning session on the 5th November with approximately 25 guests from the business community. DJD gave a short presentation and facilitated a discussion.
- City Team session on the 23rd November which included 25 guests from the retail and commercial business community. DJD gave a short presentation and facilitated a discussion, including a presentation of the economic forecasting.
- Science meeting on the 23rd November which included 10 stakeholders from the Bioscience and health sector community; and
- 1-2-1 interviews with City Centre retailers to understand their issues and the dynamics of their trading.

Social Media Conversations

Engagement with the City's residential community and the remaining business community through the use of social media.

The residential and remaining business community have been given the opportunity to engage with the 'City Conversations' through the following media:

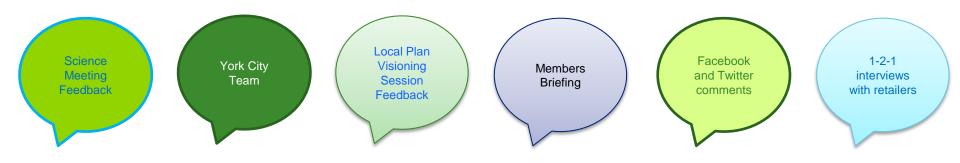

- Facebook- a 'City Conversations' Facebook page, using the existing CYC Facebook page, detailed the purpose of the consultation exercise. Participants have been able to post comments on the page and DJD/CYC have monitored and fed into this. Access to this page is through a 'google' search, through CYC's website or through the Facebook network.
- Twitter- A 'City Conversations' twitter account has posted regular 'tweets' to provoke conversations.
- Press- New articles in The Press issued by CYC.
- The consultation period was open between 7th November and 7th December
- The CYC hosted the Twitter live feed.
- The CYC website hosted a link to the 'City Conversations' Facebook page.
- The CYC to sent out a mailshot to tie in with press release on the 7th November.

Feedback Responses

The various responses from the City Conversations exercise have been recorded and are contained within the following pages. The comments have been organised according to the following themes that have emerged:

- · Identified sector strengths;
- · The City Centre environment;
- Infrastructure and accessibility.
- · York's business locations;
- Retailing;
- · Attracting staff and growing the business;
- · Planning and growth;
- · Supply chain; and
- · Marketing.

The following key indicates the source of each of the comments that are detailed in the following pages:

In a recession Where we are more manufacturing in The bio-science successful should be York has an China is becoming sector has The digital sector is European Centre of built upon eg more expensive and unrealised strong Universities, financial excellence in as such businesses potential services, research. diagnostics- this is an are choosing to reopportunity locate back to York Science Park - Have Bio-renewables Bio-renewables fantastic facilities and There should be more has potential as a has potential for opportunities to rent investment in bio sector in York e.g. growth using York Less focus on out offices but not renewable chemicals biologically based College fully occupied. Why tourism. and feed feedstocks are there vacancies? There is a growth Manufacturing find it in the number of hard to find suitable Proposed project Diagnostics has good jobs in the care sites In terms of called the Smart prospects sector- a regenerative Space Specification -Smart symptom of the medicine, links the universities and specialisation is aging population exist with Leeds research businesses the key. This general Infirmary meet on a sub-regional involves defining but not York level and decide on the sector specialisms Bio-sciences and strengths Retail will account for digital media are less that 20% of jobs sectors that are most Focus on agri-food growth important. and tourism,. Then **Diagnostics** in a market and sell to the clear strength for wider world Bio-renewables are a We need to move York towards sectors with key strength Tourism is an better quality jobs e.g. important sector but science and little opportunity of York's strength in technology growth potential. science is its Tourism is the bed Medical and Bioability to help The care sector will rock of York's ideas grow and Science. The be enormous economy. Universities play a big get to a certain reacting to the needs role in these sectors. size of a future aging For the bio-science population. USP is heritage. York The biggest growth companies, clustering is performing well sector in the job is useful but not because of heritage, sector is the care essential not shops. sector. © 2012 Drivers Jonas Deloitte. needs to be The whole city needs We should have five coordinated with bus. We have to unlock the to be alive after 5pm. or ten big wheels. York's biggest asset car park, hotel and city centre between 5 not just shops train services to and 7pm is its environment. We need a city centre maximise options to attend where culture is provided Lighting in Museum gardens There is a concern Standards in City the City should be museum that the city centre is Centre management Centre could gardens, and not a becoming too leisur need to be maintained I'd like a massive be improved led forum for events drum shop, please. and built upon - not Issue of losing retail cut back. space to A3 use. This is a concern as the York Walls can make a opportunity to significant contribution to Pedestrianise the diversify is lost. the City's green space entire city centre and should be included in The city needs vibrant any planned Keep the city vibrant multicultural activities developments free from traffic noise and eclectic We need more public and air pollution and non-commercial, The car parks civic space in the city needs to stay We need to continue The night time feels centre. open after to invest in wi-fi very different in York. 5pm in the city availability across the There is a stag/hen The city centre really centre city centre party feel. struggles after 5pm. The retail is compact We need to address but it does not have a The City Centre sees the transition period great reputation for a bigger uplift in The city centre need between 5 pm and shopping footfall at the the right mix of retail, 7pm. We should encourage weekend than Monks leisure, culture and opening of cafes and Cross business space shops after 5pm to City centre can look stop the city turning scruffy at times. into a warzone every night Despite investment, We need to continue Turn Clifford's Tower Reducing roadspace profit levels are to encourage niche car park into a large and the severing effect currently down in the retailers and middle grassland of Tower St/Fishergate We could retail sector market-high end accommodate and greening the whole independents into the area around Cliffords another city centre Invest in quality of city hotel for business Tower is something that environmental assets needs to be part of the conferences. - seats, bins, sign banqueting and vision posts, bollards. accommodation

The cultural offer

Get the public transport Proposed duelling of right and businesses Invest in Science the North ring road is will accept other Infrastructure in city A trans-shipment site unlikely. There may restrictions as ease of centre for internal well be some junction is needed travel is important for growing business improvements. employees. The City should be a The cycle lanes The carparking York is cycle friendly place with modern cause signage needs to be but there are more environmentally congestion and improved improvements that friendly transport links the bike racks can be made. look a mess People using the train from Scarborough to We must not forget Clifton Moor is Getting into and out of York, there needs to how connected we the City Centre be smaller stations, are by rail. access at peak presents a serious such as Haxby. problem In terms of air travel There are different Park and rides close improvements needed parking charges or Reducing cars into the to the connection to too early. It needs to residents and visitors. city centre, improving Leeds Bradford and be made easy for This needs to stop. coach park links and people to stay in the Manchester Airports. improving car park city centre. systems will add to the city Public transport The challenge is making it easier to get There is a perception into the city centre that it is hard and expensive to park in Transport links prove

a challenge for industry in peripheral locations

York

focussed improvements are required

difficult to

times.

The connections need improving for the pedestrians.

Train infrastructure high speed 2 Leeds and improvements made on East Coast Main Line North.

Heslington East is considered to be an opportunity site for the bio-science sector.

There should be more provision of live and work spaces

Public sector support is needed for a new science park to emerge

The Science Park is not in an ideal location to travel to and from

North Minster Business Park is a suitable location for more bioscience spaceit's the right side of Leeds

Clifton moor is approximately 30% empty. Why is this?

A central business hub is needed.

Incubating space in the centre generates 10-15 business start ups a year. People in this space tend to go back into their home once their space expires.

The ideal space for bio-science companies is a sophisticated shed with a smart front door. Poppleton Business Park- York needs to make developers rethink how to bring back into use.

York Science Park is not suitable for larger companies as they have to locate over two floors

There's not enough decent office space

within 10 mins walk of

the train station

Digital companies have a preference for a city centre location The Digital sector has £2.5m on the table for a new location- perhaps near the train station or in the Guildhall

Creative arts/digital media don't have standard office needs. Now the city has a scheme to provide an appropriate suite in the next 12 months.

Opening a small The evidence I have independent shop in The competition for is that multichannel the city is becoming the retail is the customers spend internet and the out of cost prohibitive more in store, so we because of business town shopping areas need to work with the opportunity rather rates than try to combat it. Shops shut too early and makes the environment hostile. We need to create a sustainable Reinvigorating late environment for There is only 20% night shopping quality retailers overlap in customers through Christmas will between the City drive revenue for Centre and Monks retailers Cross It would be good to Shops will soon have lots of small become showrooms independent retailers & businesses that The strength of the aren't directly linked to cultural and visitor the tourist industry. economy in York is a key driver for retail There is very little home ware offer in the City Centre National brand shops are How can we better not big enough to carry Opening a charity shop, use the space above full ranges. The city a coffee shop, a the retail? centre needs to be restaurant and a betting distinctive enough to shop is cheap, easy and attract - not the size of uncontrolled. These are the shops. not the kind of shops that

are going to provide growth.

There are few large bio-science Start-ups are companies- most good and strong are medium. Is in this city there room to grow? Digital businesses are struggling to recruit new staff due to lack of affordable housing The problems with unaffordable housing in York The is no suitable make it harder to grow-on space. attract highly Medical companies skilled staff. have to occupy space with the right image. It is impossible to attract senior staff therefore we have to train from within. If someone moves to York for a specialised job and the company goes under, there is no chance of re-employment

Attracting staff and growing the business

Need to address the skills agenda,. There are 3000 people unemployed, 550 of those are looking for sales assistant type jobs. 290 for warehouse jobs. There is a huge skills base in York that flows out to Leeds

As important as job

creation to grow

economies is

strengthening the

workforce pipeline

and nurturing talent

Jobs should fit

people, but people

need to fit jobs.

The spatial aspect of the vision needs to consider National Planning Policy – being viable and deliverable

York has a reputation as being closed for businesses

We need to build a resilient economy, with the right type of business. History of big monopolies that then go bust.

York is getting a reputation for not getting anything done. Terry's site, barbican, teardrop/York central, British sugar – all not developed.

Making the city more beautiful will secure economic growth.

Planning should not be too restrictive, showing a more strategic and flexible approach.

Why do we need York to grow? Everything suggests that a large quantity of land is needed.

Rather than city growth, it should be sub-regional growth- looking to our neighbours for strength

It is ambitious to grow and be environmentally friendly.

There should be lots of small moves, not one big one. Big moves are risky. The city should evolve through smaller moves.

Planning is a problem

Planning and growth

Alive after 5 is an interesting conceptwe've tried similar but it keeps failing- do we need better marketing?

Marketing the retail through the press is not working

Marketing of the bio-sciences should be better. There are lots of positives that aren't known

Supply chain leakage does exist e.g. Lawyers, accountants are often from Leeds or London Marketing

Supply chair

Lessons Learnt

The feedback responses have provided some valuable insight into the issues and opportunities relevant to York's economic future. The following conclusions have been drawn in relation to each of the identified themes arising from the 'City Conversations'.

- Identified sector strengths: Certain sectors of the economy are reported to show potential for growth including: the bio-sciences (with diagnostics being a specific identified strength), digital and bio-renewables. There is a desire to increase the quality of the jobs created, and this can be achieved through 'smart specialisation' in identified high productivity employment positions.
- The City Centre environment: The key messages include: a desire to extend opening hours of the whole city centre past 5pm-including retail, leisure, culture, car parking and park and ride; a need to improve the quality of the streetscape around the city centre; a focus on pedestrian movement and improving the experience of walking, including to and from key carparking sites; and maintaining the quality of the retailers, including encouraging independent retailers.
- Infrastructure and accessibility: Congestion is clearly an issue for the city and new development need to carefully consider the capacity of the existing network. Further investment in public transport into and out of the city will encourage less vehicle use- a key method for coping with capacity constraints. Restricting vehicle movement within the city centre in favour of the pedestrian is considered to be preferable, if partnered with appropriate improvements elsewhere e.g. parking and public transport.
- York's business locations: Sites in close proximity to the train station are necessary (possibly for digital?) and a new site for the bio-science sector is required as the existing science park is in an ideal location.
- **Retailing:** The strength of the York City Centre retail offer is in the quality it provides. The street environment needs to be maintained to reflect this and efforts need to be made to ensure quality independents are encouraged over non-A1 uses.
- Attracting staff and growing the business: Some highly specialised companies find it hard to recruit, and housing could be part of the problem. Training staff from within is one way to mitigate against this issue.
- **Skills:** York's residents are highly skilled and there is a good match between jobs and the skills set of its residents. This needs to be maintained as the population grows
- **Planning and growth:** Planning is often considered to be a restriction on growth but this could be appropriate given York's economic strengths in its physical environment.
- **Supply chain:** Some supply chain leakage is reported to exist.
- Marketing. There is opportunity to advertise York's achievements to enhance the investment potential e.g. strengths in biosciences
