- 5		3	

Reduce loneliness and isolation for older people

Continue work on delayed discharges from hospital

Celebrate the role that older people play and use their talents

Enable people to recover faster

Support the vital contribution of York's carers

Increase the use of social prescribing

Enable people to die well in their place of choice

Public Health Approach

- Identify population profile, demographic picture, health needs, and gaps
- Ageing well is about health and wellbeing throughout life
 - Prevention
 - Protective factors to health
- Ageing well can be influenced by a range of factors – not just health:
 - Marmot review; housing, employment, education, social connection

York Population Pyramid v England (ONS Mid 2017)

Inequalities

- Inequalities are still having an important impact within our local populations
- Locally the national picture of inequality being linked to higher rate of ill health is replicated
- Typically measured through differences in life expectancy
 - In particular healthy life expectancy

Ageing & Loneliness

- Social inclusion / social participation is a protective factor to feelings of loneliness
- Social participation and social support are strongly connected to good health and well-being throughout life
- Loneliness and social isolation is not exclusively related to older people, however older adults can face additional barriers to social inclusion
- Campaign to end loneliness <u>https://www.campaigntoendloneliness.org/threat-</u> <u>to-health/</u>

Social life/health
